

Baseline Expression Correlation Summary

Spleen vs Bone Marrow – Are cell types comparable?

Cross-Tissue CLR Comparison

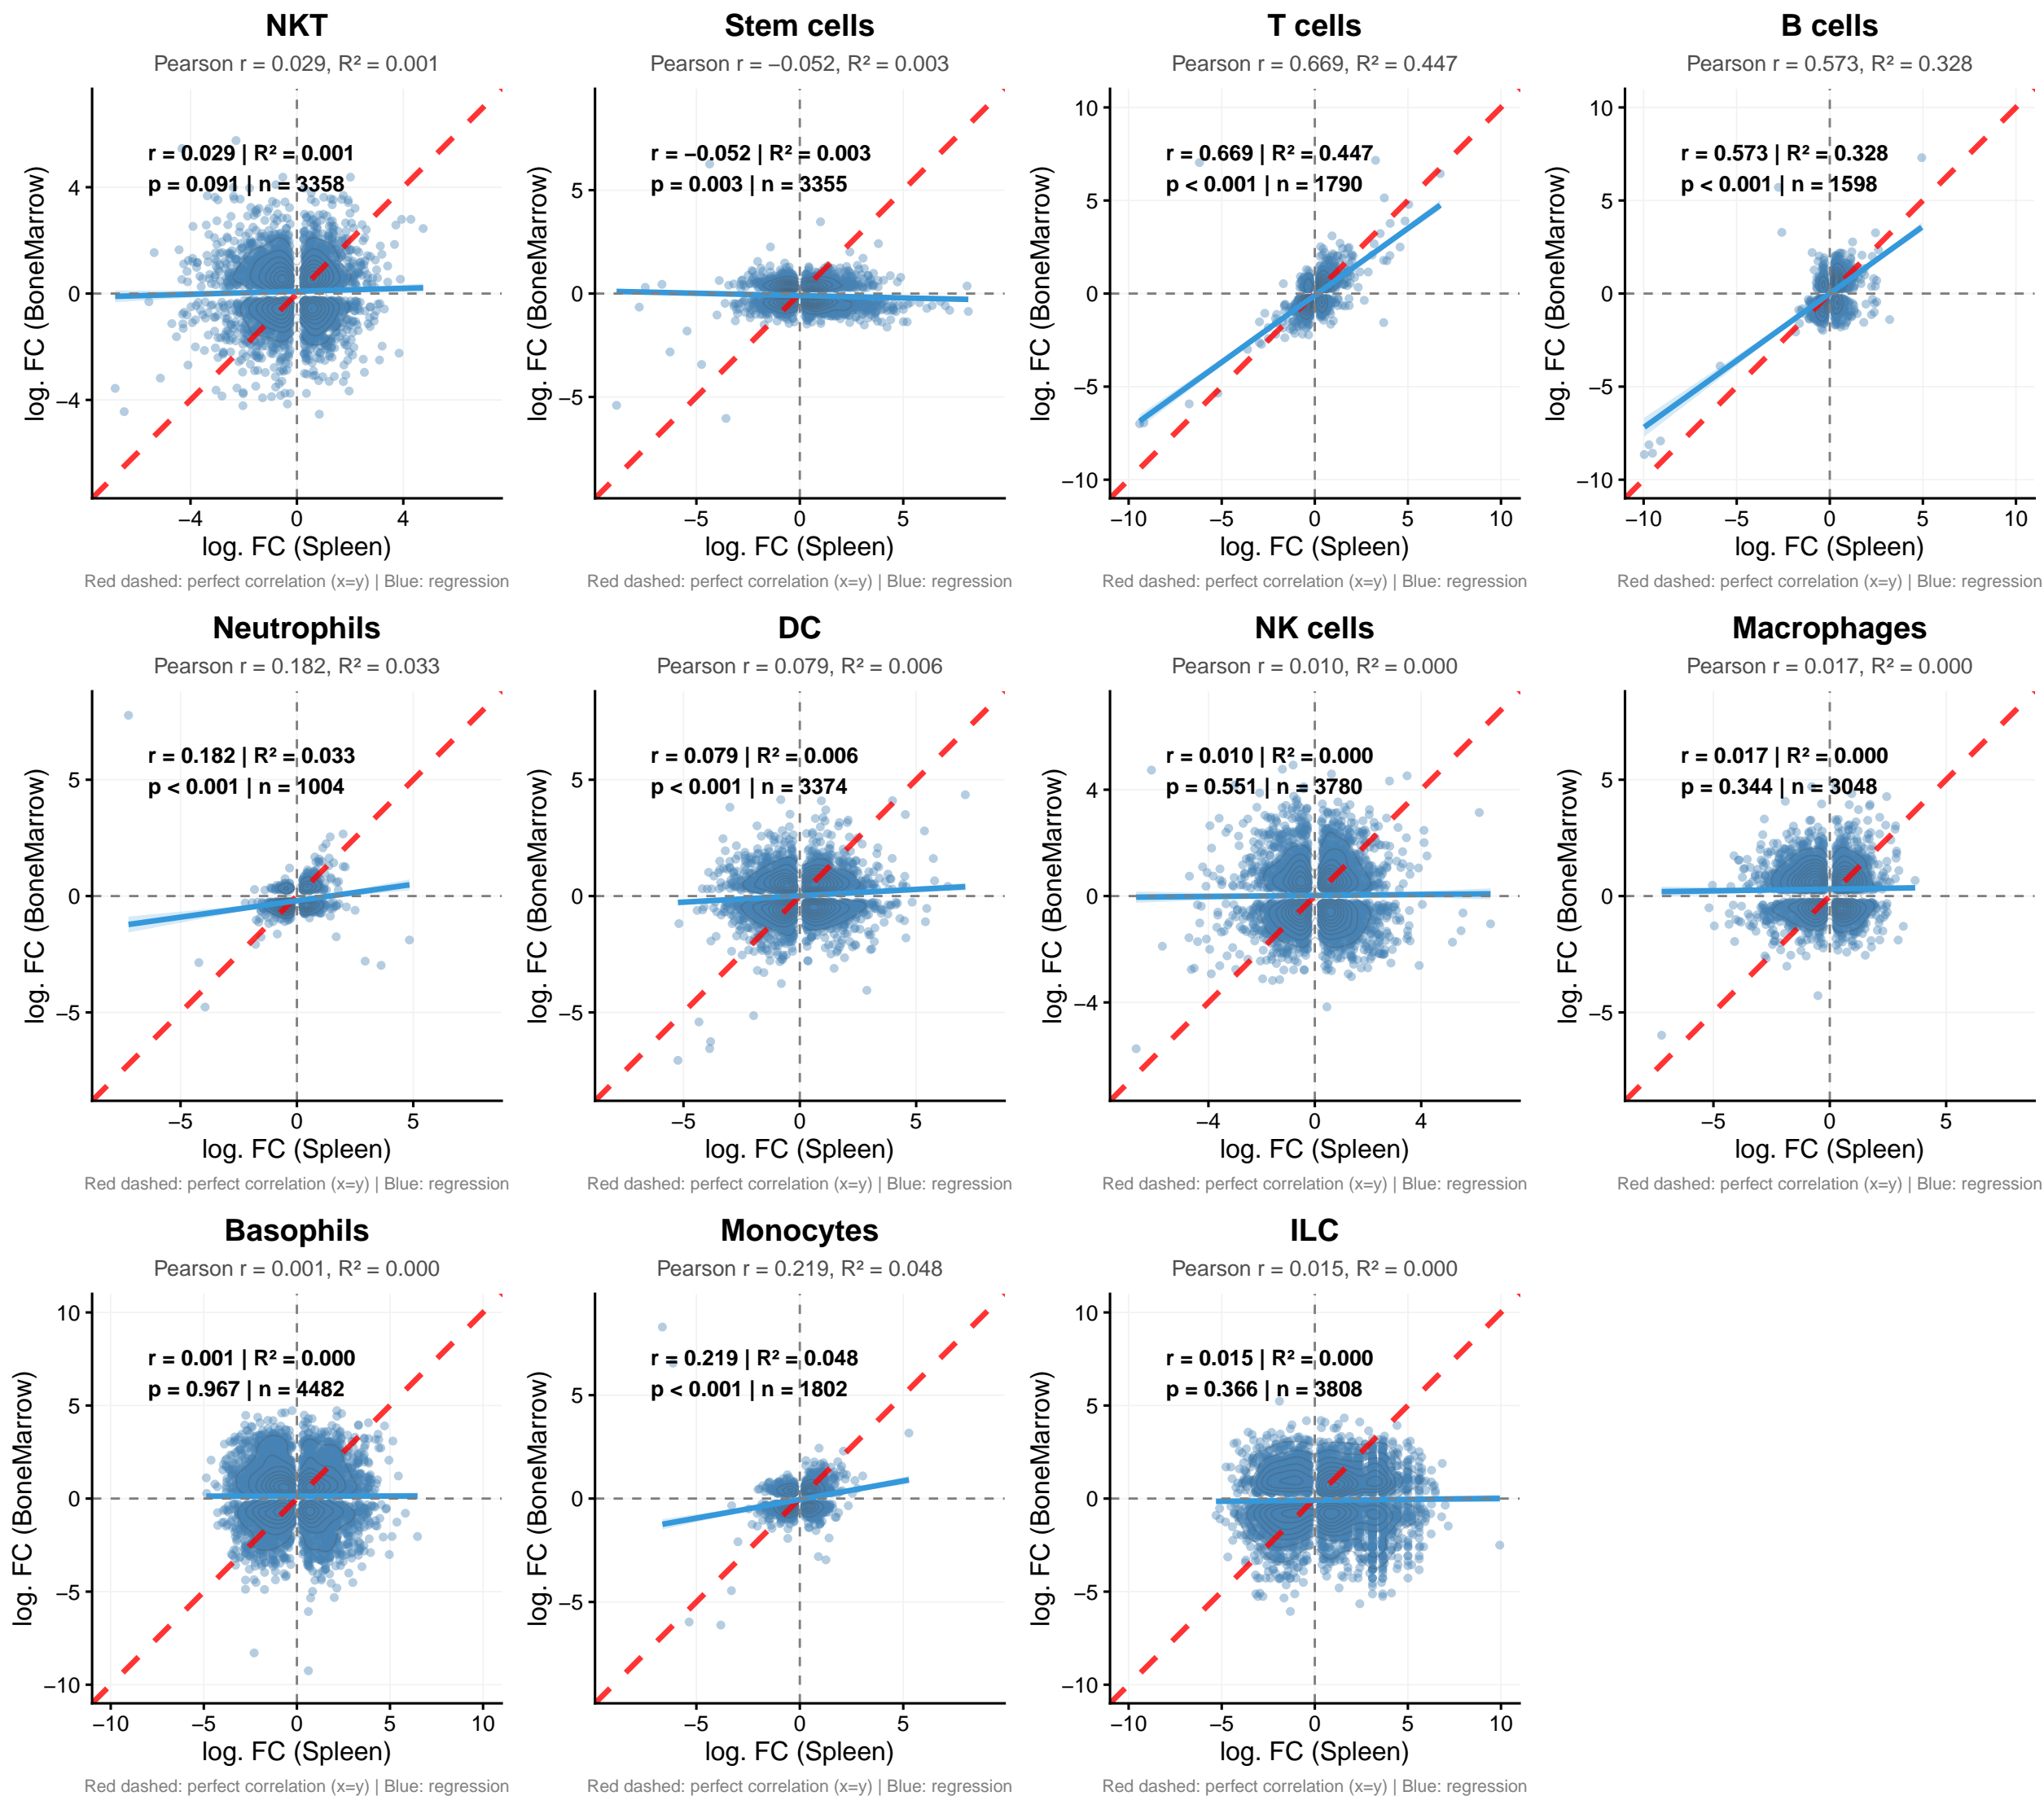

$r = 0.166$ ($p = 0.57$) | 14 cell types

Cross-Tissue DEG Correlation Summary

Cross-Tissue DEG Comparison: Spleen vs BoneMarrow

Baseline Expression – NKT

Do genes have similar expression in both tissues?

MA Plot – NKT

Systematic bias detection

Baseline Expression – Stem cells

Do genes have similar expression in both tissues?

MA Plot – Stem cells

Systematic bias detection

Baseline Expression – T cells

Do genes have similar expression in both tissues?

MA Plot – T cells
Systematic bias detection

Baseline Expression – B cells

Do genes have similar expression in both tissues?

MA Plot – B cells

Systematic bias detection

Baseline Expression – Neutrophils

Do genes have similar expression in both tissues?

MA Plot – Neutrophils

Systematic bias detection

Baseline Expression – DC

Do genes have similar expression in both tissues?

MA Plot – DC
Systematic bias detection

Baseline Expression – NK cells

Do genes have similar expression in both tissues?

MA Plot – NK cells
Systematic bias detection

Baseline Expression – Macrophages

Do genes have similar expression in both tissues?

MA Plot – Macrophages

Systematic bias detection

Baseline Expression – Monocytes

Do genes have similar expression in both tissues?

MA Plot – Monocytes

Systematic bias detection
